DOTS Address Validation – US 3

CORRECT, VALIDATE & STANDARDIZE US ADDRESSES

DOTS Address Validation – US 3™ by Service Objects is a real-time web service API that enables businesses to instantly verify, correct and append address information to contact data records.

This programmable web service improves mail processing and delivery rates by standardizing contact records against USPS® data and adding missing information. Our extensive databases with millions of unique addresses combined with the USPS®-certified DPV data returns highly accurate match rates.

INPUT

<table>
<thead>
<tr>
<th>Business Name</th>
<th>Service Objects</th>
</tr>
</thead>
<tbody>
<tr>
<td>Address</td>
<td>27 E Cota St Ste 500</td>
</tr>
<tr>
<td>City</td>
<td>Santa Barbara</td>
</tr>
<tr>

FEATURES

• Proprietary database with hundreds of millions of unique addresses
• CASS™-certified software standardizes, and validates addresses, correcting typos and missing postal information including bad street names, cities, states, and ZIP codes
• Database of USPS® street addresses updated monthly
• Delivery Point Validation (DPV) verifies that the address is deliverable, and flags for vacancies and addresses returning mail
• Residential Delivery Indicator (RDI) identifies addresses as residence or business
• SuiteLink (SLK) data appends secondary suite information to business addresses
• Appends addresses with carrier route and barcode digits for easy sorting and delivery
• Response time as fast as 100 milliseconds
• Real-time API or batch service available
• Supports REST, SOAP, GET and POST requests over HTTP/S outputting in XML or JSON formats

SAMPLE REQUEST URL

Here is an example of a URL passing data as parameters:

PRODUCT BENEFITS

• Reduces the cost of lost, undeliverable and returned mail
• Flag residential addresses to calculate additional shipping charges
