

DOTS Address Detective – International

INSTANTLY CORRECT OR APPEND THE COUNTRY TO YOUR CONTACT RECORDS

DOTS Address Detective - International is a real-time API that instantly identifies and corrects the country in your contact records. Leveraging hundreds of authoritative data sources, Address Detective - International performs a multi-point cross-comparison on a contact's name, address, phone, email and IP address.

Address Detective - International helps businesses more effectively localize sales and marketing efforts and route leads more effectively by providing the geographic location of customers and prospects. In addition, with over 100 global Data Protection laws currently in existence, knowing your customer's location is the first step to being compliant with these rules and regulations.
